1 Introduction

In the following link, you can find the database: ([click here](#))

Perform the following tasks:

- Drop the columns 'ref_transaction' and 'stock'.
- Rename the columns:
 - 'price_registred_' to 'price'
 - 'month_extracted_from_Date' to 'month'
 - 'quantity_sold' to 'quantities'
- Determine the first five days with the highest sales.
- Determine the percentage of days with sales promotions ('promotion_day').
- Determine the average sales for the month of December.
- Calculate the total profit (utility) for the entire dataset and compare the average profits in January and December.
